Osteoporosis - A Practical Update on Management and Sequencing Therapies.

Presented by

Tegan van Gemert

Endocrinologist | Gilmore Street Specialists, Kelso NSW

An overview of osteoporosis diagnosis and the pitfalls of bone densitometry as well as an update on the management of osteoporosis; when to use which therapy in high-risk patients, and the importance of therapy sequence with osteoanabolic agents.

Program

6.30pm Registration, networking and light refreshments
6.50pm Welcome, Acknowledgement of Country & Introduction
7.00pm Education session and Case Study Discussion
8.00pm Interactive discussion / Q&A
8.25pm Evaluation
8.30pm Close

Learning outcomes

- Interpret bone densitometry results and calculate fracture risk, taking into account possible secondary contributors to low bone density
- Identify patients at very high risk of fracture for consideration of osteoanabolic therapy as first line therapy
- Tailor first line osteoporosis treatment to individual patients, taking into account their future fracture risk to optimise sequencing of therapy
