Other information

Please take note of the renal medicine referral guidelines when referring patients to the renal medicine department, available on this website.

Dubbo Health Service comprises a fully functional renal service at both an outpatient and inpatient level. Coordinated care in acute and chronic renal failure, management of end stage renal disease/dialysis and renal transplantation is all available locally. Our 3 renal physicians provide a comprehensive inpatient and outpatient service within the Northern Cluster of WNSWLHD. All 3 physicians are resident full time in Dubbo and are employed by Dubbo Health Service with offices at the Dubbo Hospital Specialist Medical Centre at Suite 1, 77 Myall Street. They are happy to receive referrals to review patients in Dubbo, but also provide outreach services to smaller towns to reduce the burden of travelling for patients and family. They are also readily able to provide treatment follow up via a Telehealth solution. All clinics are Medicare Bulk Billed within the public hospital system.

Outreach renal services are provided by:

- Dr James Collett – Mudgee Hospital monthly, Bourke AMS monthly
- Dr Jeniffer Fiore-Chapman – Walgett MPS monthly, Cobar MPS monthly, Warren MPS quarterly
- Dr Colin McClintock – Coonabarabran Hospital (community health building) monthly, Brewarrina MPS monthly
