Note: registration will enroll you into the online component. You will receive an email (check your spam folder) with the link to the course dates page and a password. You will need to select this course then enter the password.

ABOUT THIS COURSE

The suturing course provides the theoretical and practical essentials to close and manage noncomplex traumatic laceration, biopsies and surgical excisions.

This course is ideally suited to nurses, doctors and medical students that have little or no suturing experience or wish to advance their current basic skill of only using single interrupted suturing technique.

There is an online component to complete prior to attending the practical day.
