If you do not consent to your image(s) or voice being recorded or shared, please email cpd@wnswphn.org.au

Practical Ophthalmology for General Practice

Presenter

Dr James Sterrey, Ophthalmologist

This activity supports GPs to provide evidence-based care in the recognition, assessment, and management of common ophthalmological presentations. It focuses on identifying clinical red flags and sight-threatening eye conditions, differentiating causes of red eye and visual disturbance, and implementing appropriate initial management. The activity also highlights best-practice referral pathways for urgent ophthalmic review and supports the screening, monitoring, and coordination of care for patients at risk of diabetic retinopathy.

Program

6.30pm Registration/Light Dinner (*provided*)
6.55pm Welcome
7.00pm Education Session
8.15pm Q&A
8.25pm Evaluation & Close

Learning Outcomes

1. Identify clinical red flags and key features of common eye emergencies requiring urgent referral.
2. Differentiate common causes of red eye and visual disturbance in general practice, including benign and sight threatening conditions.
3. Implement appropriate initial management and referral pathways for patients presenting with acute eye symptoms.
4. Apply screening and monitoring principles for diabetic retinopathy, including patient recall and care coordination
