8.25pm Evaluation
8.30pm **Close**

The Hybrid Virtual Memory Clinic

Presenters
Dr Tasneem Mayat hVMC Medical Director, University of Sydney, Geriatrician
Dr Phil Butler, Geriatrician OHS

Description
This session will help GPs to confidently assess and manage patients presenting with memory concerns. It will explore how to differentiate between normal ageing, mild cognitive impairment (MCI), and dementia using practical, evidence-based tools suitable for general practice. Participants will engage in a case-based discussion to apply learning to real-world scenarios and explore local referral pathways, supports, and resources available to patients and families in rural settings.

Learning Outcomes
Identify clinical features that differentiate normal ageing, mild cognitive impairment (MCI), and dementia.

Apply appropriate cognitive screening tools and baseline investigations in the assessment of suspected cognitive decline.

Outline local referral pathways and supports available to patients and families following a diagnosis of dementia or MCI.

Explain how the Hybrid Virtual Memory Clinic operates and supports the assessment and management of patients with cognitive concerns.
