Webinar Recording

By participating in this virtual education session, you consent to being filmed and recorded by WNSW PHN, presenters and partnering organisations. Recordings and images may be used by WNSW PHN, presenters and partner organisations for promotional, educational, reporting and marketing purposes, including social media and online learning resources. If you prefer not to appear in recordings or photographs, please keep your camera off and use the Chat function to ask questions or contribute to the chat.

Terms & Conditions

- If you are viewing the webinar as a group, using the same screen or device, please enter the name, role and workplace of each participant in the Chat. This information will be used for attendance records.

Practical Skills for Chronic Disease Screening and Management

Presenter

Amanda Taylor

Clinical Lead – Chronic Disease Services, Credentialed Diabetes Educator & Pharmacist
Marathon Health

Facilitated by

Aboriginal Health and Wellbeing Team representative

Western NSW Primary Health Network

Chronic diseases such as heart disease, diabetes and kidney disease continue to affect many Aboriginal people, families and communities. Aboriginal Health Professionals play an important role in supporting prevention, early identification, screening and ongoing care through trusted relationships, everyday yarns and support.

This webinar will explore why early identification and screening are important, and how Aboriginal Health Professionals can help encourage participation in health checks, screening and chronic disease care. Participants will discuss practical opportunities to support community members through Aboriginal and Torres Strait Islander Health Checks (MBS Item 715), Chronic Condition Management Plans and other everyday interactions.

The session will also highlight local resources, referral pathways and practical tools that can be used to support chronic disease prevention, self-management and care, helping Aboriginal people and communities stay healthy and well.

Program

- | | |
|----------------|--|
| 10.25am | Login |
| 10.30am | Webinar start (Welcome, Acknowledgement of Country & Intro) |
| 10.35am | Education session |
| 11.15am | Q&A (Presenter and Audience) |
| 11.20am | Yarning session (Facilitator and Audience – this segment is not recorded) |
| 11.30am | Evaluation and close |

Learning Outcomes

- **Explain** why screening to find kidney disease, type 2 diabetes and heart disease early is important for Aboriginal people, families and communities.
- **Recognise** opportunities in everyday practice to promote chronic disease screening and support Aboriginal people to access Health Checks (MBS Item 715) and Chronic Condition Management Plans.
- **Identify** local services, referral pathways and practical tools that can support chronic disease prevention, screening and self-management for Aboriginal people.
